About Me.

IT professional and data analyst. As data analyst, I've solid experience in coding languages such as **Python** and **R**, non-procedural languages such as **SQL** and **HTML**, additional tools like **spreadsheet software** (such as **Excel** and **google sheets**) and BI tools such as **Microsoft Power BI** among others. As an IT professional, I've got the opportunity to work with operative systems such as **Windows** and **Linux**. During the last 6 years, I've been collaborating with international teams, experience that has helped me to develop my skills to adapt to environments that are challenging and constantly changing.
